

## TIE-IN REFORMING CLAMP

WorldWide Machining & Welding, Inc. has developed a tie-in reforming clamp.

### FIELD APPLICATION

Use of the tie-in reforming clamp allows for safe and accurate alignment of pipe when used in both shop and field applications.

### FEATURES/SPECIFICATIONS

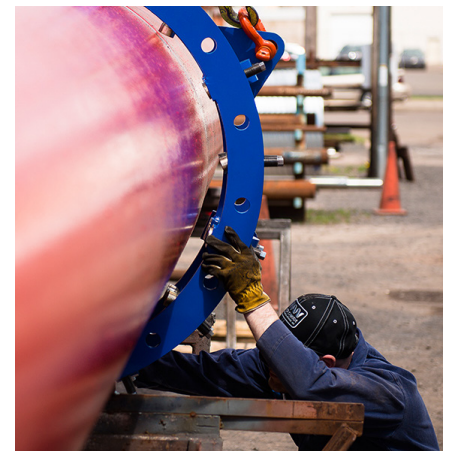

- Clamp allows for safe, accurate alignment of pipe when used in both shop and field applications
- Design incorporates two lifting points for increased maneuverability during installation and application
- Individual jacking screws adjust out-of-round conditions in the pipe and allow installation of 100% of the root bead
- Wedgeless reforming capabilities

alleviate gouging, marking-up and damaging of the pipe

- Assembly for each clamp is powder-coated for wear and tear
- Clamps are designed with A514 T-1 steel to withstand many hardworking applications

### PROCUREMENT

Prices and lead time quotes available upon request.

### SIZES

Range	14"-48" pipe
-------	--------------

The tie-in reforming clamp is available in size ranges from 14" pipe-48" pipe at this time. Custom sizes available are upon request.

*Please reference the order drawings for additional specifications.*
